The Safety Experts

For over 25 years Code Blue's primary job is to keep people safe. Security is more complex than just calling for help. It extends to protection requiring a proactive approach. Our products help by empowering responders before during and after an incident and has become a symbol of security in world-wide installations. Our hardware products provide emergency signaling solutions complying to industry standard providing maximum reliability support by unmatched service.

Vigtron is the leading global manufacturer of innovative complete infrastructure transmission solutions for IP CCTV systems. Vigtron performance is supported by complete certified testing along with integration with world-leading IP-based security products. We offer free and without obligation Infrastructure Design Services staffed by experienced system engineers. Vigtron provides the industry's longest warranty. Vigtron is based in San Diego, California with sales and manufacturing facilities worldwide.

Code Blue PoE Powered by Vigtron

Why PoE

Using Power over Ethernet has several advantages over the use of local power. First, is eliminating the need for local power and centralizing power sources usually at the headend providing the ability to easily monitor and reset power if required. Second, PoE reduces cable as both power and data are carried on a single cable. Third, it is possible to extend distance and power multiple connections over a single cable.

Code Blue PoE Products

Pi-100_CB1e

Vandal-resistant Communications multi-functional, freestanding pedestal includes a, hands-free communications device illuminated by a high intensity faceplate light and a powerful combination blue beacon/strobe light.

Pi-104_CB1s

Pi-141_CB4r

Vandal-resistant wall or pole mount that is multi-functional and constructed of stainless steel. Includes a high quality, hands-free communications device illuminated by a high-intensity faceplate light suitable for interior or exterior applications.

Pi-141_CB4r

Vandal-resistant wall or pole mount that is multi-functional and constructed of stainless steel. Includes a high quality, hands-free communications device illuminated by a high-intensity faceplate light suitable for interior or exterior applications.

Vigitron - Code Blue Solutions

PoE Single channel Solutions

Vi2201 Single Channel PSE

Multiple Network Switch Solutions

Vi30210 / Vi30208
Industrial Network Switches
Harden Industrial Network Switches

Vi30110/ Vi30126 Series
Industrial Network Switches
Desktop Network Switches

I need to transmit and Power to more than one device on a single cable.

Many times you need to add a light to an existing camera installation but already have one cable installed. Code Blue – Vigitron solutions allow you to add combine multi device Power and Video on a single cable.

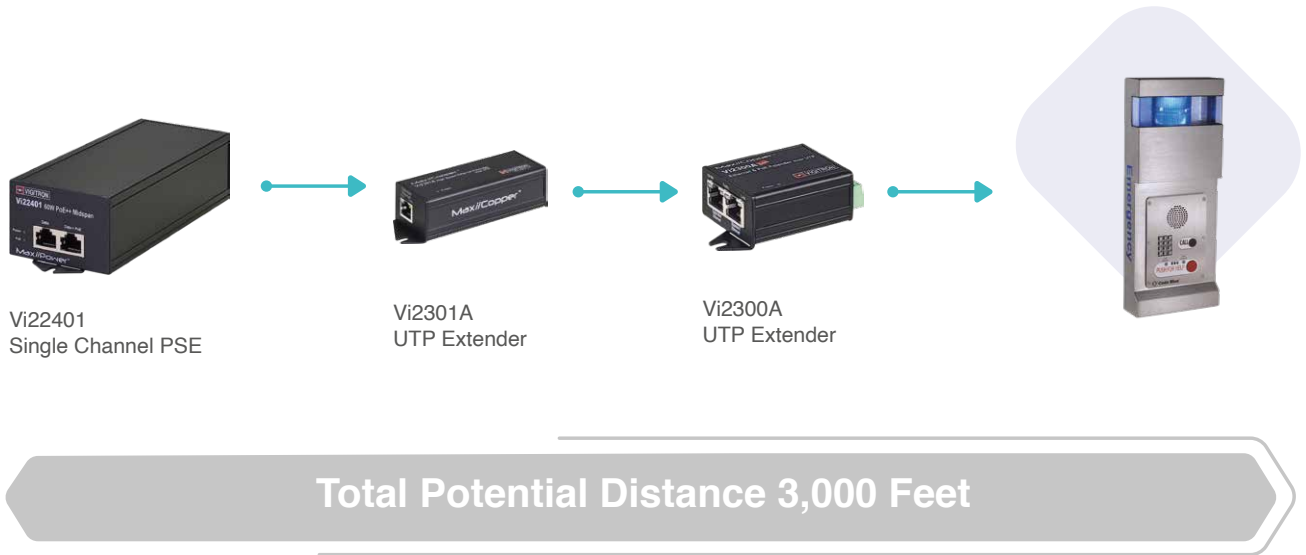

Vi22401
Single Channel PSE

Vi30103
3 Port PoE
Switch/Repeater

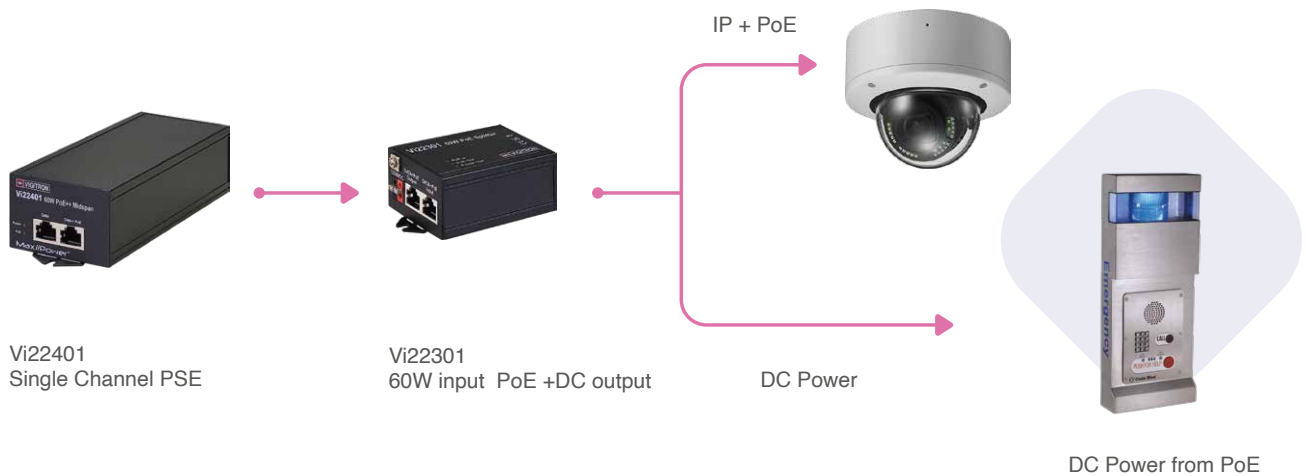

I need to extend the distance to my Code Blue Device greater than 328 feet

I want to use PoE but my Code Blue product is only DC powered

I need to add a light to my existing camera installation but only have one cable and the Code Blue Device works on DC only
