

## Connecting Multiple PoE Cameras over Coax

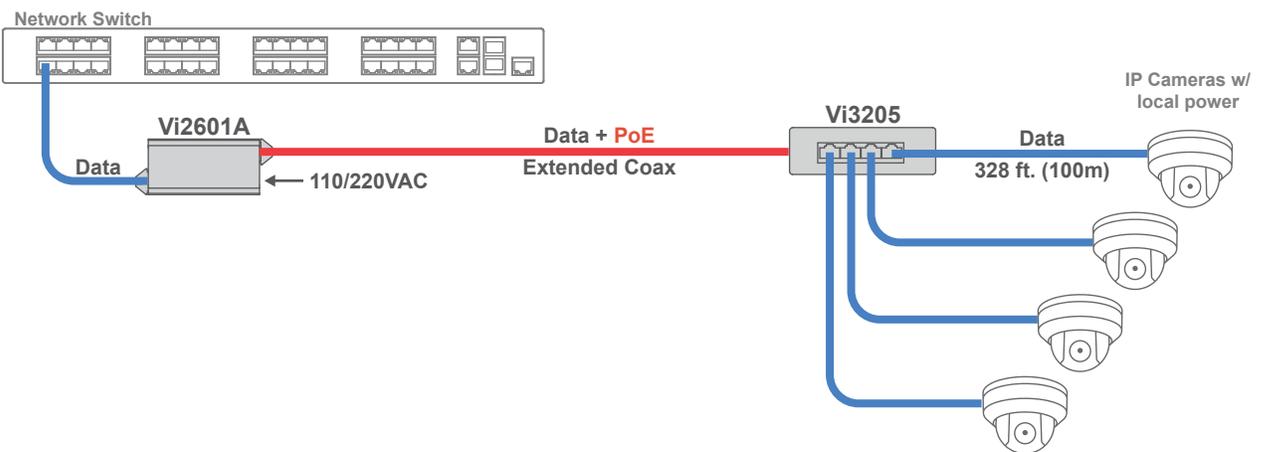

The Vi2601A and Vi2401A provide a reliable power source for the long distance and higher power requirements of PTZ domes and IP cameras with power surges due to accessory features such as day/night, LED operations, and auto focus with heater/blower functions.

## Connecting Multiple PoE Cameras over Coax

The Vi2601A and Vi2400A provide a reliable power source for long distance high power installations. The Vi2400A's compact size fits in many environmental enclosures such as J-box, 4 square, and back boxes of many IP cameras.

## Connecting Multiple PoE Cameras over Coax

The Vi2601A and Vi3205 eliminate the need for any local network switch power, while providing a single coax path for transmitting four cameras from remote locations. This combination simplifies installation and reduces costs.
